

dearest fcc, I am a simple man who enjoys ham radio communication. As we all know ham radio has been the means for communication around the world when there was no other. when the elctricity was out, no phones, no smoke signals, no drums and before the so called computer, witch has done more harm than good. It only does what it is told. It pays your bills for you, It plays games with you, It shows you pictures of places some people would never see in there lives. It thinks for you, Sounds good dont it? Now lets look at the other side, You can buy drugs without a prescription, You can have your identity stolen, It can even show you VERY VERY AWFUL and PAINFUL pictures that would shame the crulest of heart. It can even STEEL your little girl. I have a computer, and i have a little girl. She sits with me, Spends time with me, and listens to the wounderful people of ham radio. It has not once tried to sell either of us drugs, Show either of us sick pictures, It does not think for either of us. And it has not tried to steel her from me. There are alot of people who do not have anyone to say, "good morning" too, How are you feeling on this wonderful day? lets go somewere, or just, I Love You. For lots of people, ham radio is all they have. To even think of diturbing ham radio with this so called (bpl) Is the worse thing that could be done. These so called (bpl) People need to stop an smell the coffee, money is not everything! That old man in front of that radio that has no one or nothing to live for, just might be YOUR dad. That little girl talking to that strange person on the computer, just might be YOURS, DO THE RIGHT THING!! FIND ANOTHER ALTERNATIVE
